

# WORK SHEET

## Module 7

## Intersections

Name \_\_\_\_\_

Date \_\_\_\_\_

Score \_\_\_\_\_

Intersection 1

1. The rural intersection shown in above is controlled by two signs.
  - A. Name the two signs.
  - B. Why are both signs here?

## Intersection 2

2. Examine Intersection 2.
  - A. Is this urban intersection controlled or uncontrolled?
  - B. What clues and signs does the driver have?
  - C. What are cross traffic and oncoming traffic required to do here?
  - D. What must the driver do?

## Intersection 3

3. Study Intersection 3 and answer these questions.
  - A. How many intersections are visible from the driver's seat?
  - B. Are the intersections controlled or uncontrolled?
  - C. Which zones are open?
  - D. Which zones are closed?
  - E. How should the driver of the vehicle that sees this scene demonstrate courtesy?
  - F. What illegal maneuver, if any, is shown here?
  - G. Describe the target area.

#### Intersection 4

4. There are several choices a driver must make when approaching Intersection 4.
  - A. What are some of the choices, and how does a driver know?
  - B. You are the driver. Based on the target area, which lane are you in?
  - C. What are some precautions you need to take at this intersection?
  - D. Does this intersection have protected turns? How does the driver know?
  - E. What options are available to a driver approaching the intersection in the far right lane?
  - F. Can the driver in the right lane turn into the businesses on the left side of the road just past the intersection?

## Intersection 5

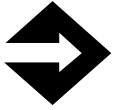

5. Study Intersection 5 and answer the following questions.
  - A. How many intersections are visible in Intersection 5 from this view?
  - B. Are/is the intersection(s) controlled?
  - C. You are the driver approaching this intersection. Describe the target area.
  - D. What lane position are you in?
  - E. Is your front zone open or closed?

## Intersection 6

6. Examine Intersection 6.
  - A. How many streets cross at this intersection?
  - B. Are any of the streets one-way?
  - C. Which direction(s) can the car in the right lane go or is it parked?
  - D. Based on lane position and target area, which lane is this driver in?
  - E. What must the driver do when the light turns green?

# WORK SHEET Answer Key

## Module 7

## Intersections

- A. The signs are “stop” and “yield”.
  - B. The stop sign regulates traffic approaching the crossroad.  
The yield sign is for a diagonal street that cuts across the target area before the intersection and turns to the right.
2.
  - A. This is a controlled intersection.
  - B. As a driver approaches this intersection, they should see the “All Way” stop, the stop line and crosswalk, the “Do Not Enter” sign across the street, vehicles parked facing oncoming traffic on both sides of the roadway, the “wrong way” sign.
  - C. The cross traffic and oncoming traffic must all come to a stop before proceeding
  - D. The driver of the vehicle with this view must stop, and turn right or left.
3.
  - A. At least two intersections can be seen here.
  - B. The first intersection is controlled by a stop sign the driver is approaching. Did you see it in the trees? The shape of the back of the sign should have clued the driver to look for a sign on his side of the roadway.
  - C. Cannot see the sides or rear zones, none of the front zones are open.
  - D. The left front, front and right front zones are all closed in this situation.
  - E. Move into lane position 5 if there are not parked cars to allow room for the oncoming car to pass safely. Prepare to cross the intersection and move to lane position 5 after the stop for the other oncoming vehicle.
  - F. The car parked on the left side of the roadway is illegally parked.
  - G. The farthest approaching vehicle is in the target area.
4.
  - A. The road paint and overhead signs inform drivers what lanes are available for certain maneuvers, continue straight, turn right or turn left.
  - B. The driver is in the left most lane going this direction.
  - C. When drivers are turning left, they must stay in their own lanes to avoid a crash.
  - D. The two lanes to the left have controlled left turns, as seen by the yellow arrows on the light, and paint markings on the roadway.
  - E. The far right lane can go straight or turn right.
  - F. NO. The island in the middle of the roadway ahead lets drivers know that they will not be able to turn left once they cross this intersection.
5.
  - A. At least two, maybe three
  - B. The one to the right that may be uncontrolled; the stop sign controlled intersection, and possible another near the white vehicle up the hill not completely visible.
  - C. The target area is the area from the front of the picture toward the building
  - D. The front zone is closed because of the stop sign. Line of sight is limited by the curve in the road at the top of the hill.
6.
  - A. This is a five (5) point intersection.
  - B. There is one one-way street, the left side street (with messy crosswalk).
  - C. The driver of the car on the right can turn right into the hospital or go straight.
  - D. The driver is in the left turn lane.
  - E. When the light turns green, the driver must yield to any oncoming traffic (this is not a protected left turn) and can only make the slight left turn.
